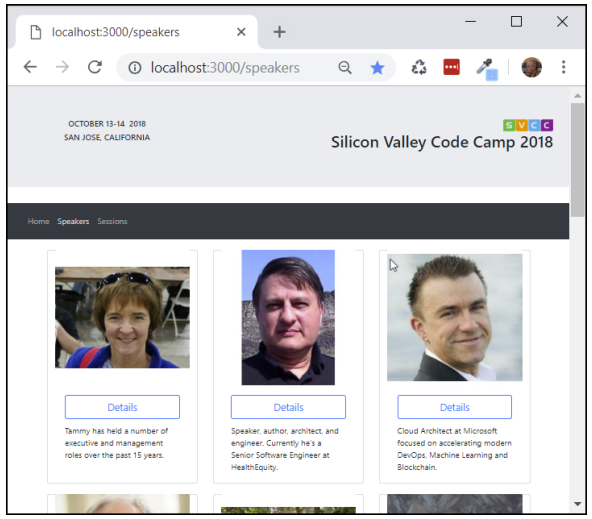
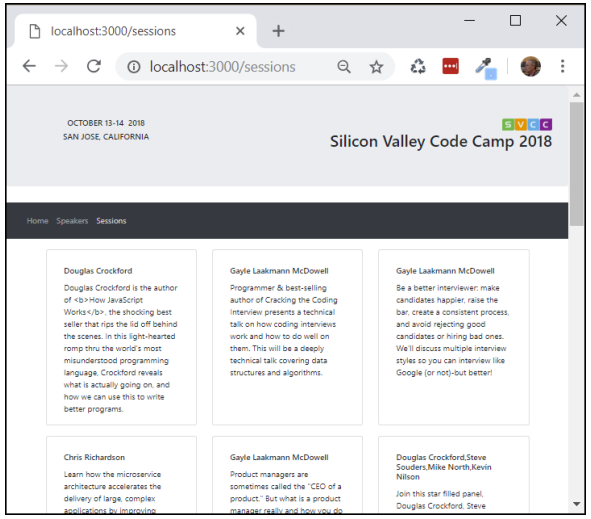
What We Will Build in This Module

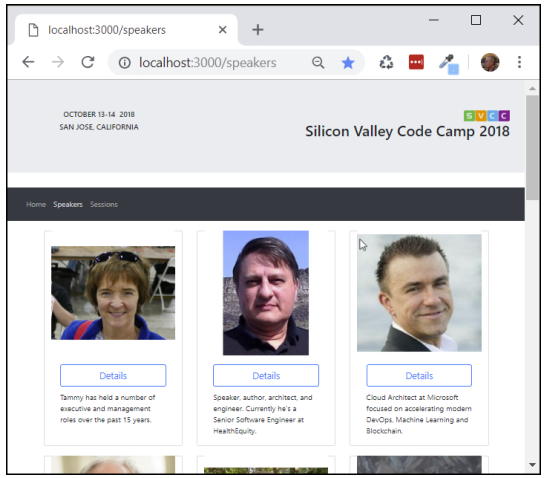


Speakers



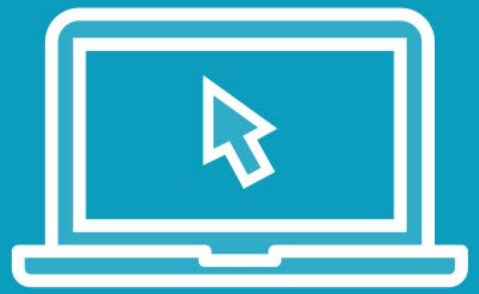
Sessions

Building a Simple React App with No Build System



- Add some static assets
- Bring in Bootstrap classes
- Static HTML page for Code Camp
- Refactor refactor refactor
- _app.js and _document.js

Demo



Bootstrap 4

Static assets

Standard Page Layout

Learn how to use the Next.js _app.js to implement page layouts

Working with URLs with Parameters

Without parameters

http://localhost:3000/

http://localhost:3000/speakers

http://localhost:3000/sessions

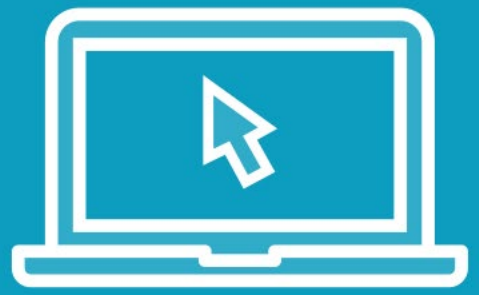
With parameters

http://localhost:3000/speaker/1124

Client-side Routing

```
<li className="nav-item">
    <Link href="/speakers" >
        <a className="nav-link">
            Speakers</a>
    </Link>
</li>
```

Demo



Refactor components

- Extract Header, Menu and Footer
- Update Menu to include Link
- Add SessionCard and SpeakerCard
- Update Sessions and Speakers

Takeaways

- Next.js plethora of resources
- DRY (don’t repeat yourself)
- Layout management
- Security tokens
- Extensible
- Coming up
