AI Threats to Swedish Society consent form

1. Background and goal	The study is conducted within the thesis work at the Department of Computer and Systems Sciences (DSV), Stockholm University. The Question of the study is: *How are Swedish IT professionals addressing AI-related threats in their own work?*
2. How does the study work?	We in the study collect data through four interviews, of which this is one of them. There are around 17 questions will be centred around the topic of AI-related threats. The interview should take no longer than 30 minutes, and the data we would gather would be used to further our research on the topic and the recording will be deleted as soon as we're done with the transcribing.
3. What are the risks?	There are no risks when it comes to our interview.
4. Data management	The data will be stored privately on our computers until we're done with the transcription, and the interviewees will be anonymous.
5. Volunteering	Participation in the study is entirely voluntary and can be discontinued at any time without further explanation.
6. Responsibility	The study is conducted by Ines Brenner-Bajic, Phone: 0760556496, and Marah Thomas, Phone: 0720308457, both of whom are students at Stockholm University

Informed consent

I confirm that

- I have received this written information about the research study.
- I give my consent to participate in the study and know that my participation is entirely voluntary.
- I am aware that I can terminate my participation at any time and without explanation.
- I allow the information I have received and that the collected data about me be stored and handled electronically by study managers.
